

TECHNICAL BULLETIN 1-08

AALPS 4.3.4.1 IMPORT ERROR

When importing to AALPS 4.3.4.1 from MDSS II 7.1 and 7.2 an error occurs in which AALPS will take the last item from the export file (sorted by NSN in ascending order) and make it a component and non air-loadable item that can not be edited in the Deployed Equipment List (DEL).

The screenshot displays the 'DEL - Deployment Equipment List - AALPS222' application window. The main table lists equipment items with columns for PackageID, Loadable, Nomenclature, and Model/Code. The item with PackageID 4567 is highlighted in red. It is a non-loadable item (Loadable: N) with the nomenclature 'TRUCK CARGO, 7T, MTRV' and Model/Code 0.

An 'Editing component Item M11000 2320014652176 4567' dialog box is open, showing fields for LIN, Idx, Component Name, Nomenclature, NSN, Movement Priority, Shipping Configuration, Equipment Type, and Description. The NSN field contains '2320014652176' and the Description field contains 'TRUCK CARGO, 7T, MTRV'.

A 'DEL' error dialog box is displayed in the foreground, indicating an error: 'ITM0017: Item not Air-Loadable'. The message states: 'Vehicles must have at least one axle. Add axle or change equipment type and/or shipping configuration.' The dialog has an 'OK' button.

The status bar at the bottom of the application window shows: 'Passenger count: 0', 'Item count: 12', 'Created: 20080722', 'Updated: 20080722', and 'Owner: aalpsuser'.

CORRECTING THE AALPS IMPORT (WORK AROUND)

In order to import your MDSS II export file into AALPS it is suggested that the user insert an item into the techdata to be used only when exporting to AALPS.

MAGTF-LOGAIS System Administration - [TECHDATA]
